

Notes on 'Basic Algebraic Topology'

Bailey Arm

June 22, 2025

Contents

1	Introduction	5
1.1	The Basic Problem	5
1.2	Fundamental Group	5
1.3	Function Spaces and Quotient Spaces	5
1.4	Relative Homology	5
1.5	Some Typical Constructions	5
1.6	Cofibrations	5
1.7	Fibrations	5
1.8	Categories and Functors	5
1.9	Exercises	5
2	Cell Complexes and Simplicial Complexes	5
2.1	Basics of Convex Polytopes	5
2.2	Cell Complexes	5
2.3	Products of Cell Complexes	5
2.4	Homotopical Aspects	5
2.5	Cellular Maps	5
2.6	Abstract Simplicial Complexes	5
2.7	Geometric Realisation of Simplicial Complexes	5
2.8	Barycentric Subdivision	5
2.9	Simplicial Approximation	5
2.10	Links and Stars	5
2.11	Exercises	5
3	Covering Spaces and Fundamental Group	5
3.1	Basic Definitions	5
3.2	Lifting Properties	5
3.3	Relation with the Fundamental Group	5
3.4	Classification of Covering Projections	5
3.5	Group Action	5
3.6	Pushouts and Free Products	5
3.7	Siefert-van Kampen Theorem	5
3.8	Applications	5
3.9	Exercises	5
4	Homology Groups	5
4.1	Basic Homological Algebra	5
4.2	Singular Homology Groups	5
4.3	Construction of Some Other Homology Groups	5
4.4	Some Applications of Homology	5
4.5	Relation between π_1 and H_1	5
4.6	All Postponed Proofs	5

4.7	Exercises	5
5	Topology of Manifolds	5
5.1	Set Topological Aspects	5
5.2	Triangulation of Manifolds	5
5.3	Classification of Surfaces	5
5.4	Basics of Vector Bundles	5
5.5	Exercises	5
6	Universal Coefficient Theorem for Homology	5
6.1	Method of Acyclic Models	5
6.2	Homology with Coefficients: The Tor Functor	5
6.3	Künneth Formula	5
6.4	Exercises	5
7	Cohomology	5
7.1	Cochain Complexes	5
7.2	UCT for Cohomology	5
7.3	Products in Cohomology	5
7.4	Some Computations	5
7.5	Exercises	5
8	Homology of Manifolds	5
8.1	Orientability	5
8.2	Duality Theorems	5
8.3	Applications	5
8.4	de Rham Cohomology	5
8.5	Exercises	5
9	Cohomology of Sheaves	5
9.1	Sheaves	5
9.2	Injective Sheaves and Resolutions	5
9.3	Cohomology of Sheaves	5
9.4	Čech Cohomology	5
9.5	Exercises	5
10	Homotopy Theory	5
10.1	H -Spaces and H' -Spaces	5
10.2	Higher Homotopy Groups	5
10.3	Change of Base Point	5
10.4	Hurewicz Isomorphism	5
10.5	Obstruction Theory	5
10.6	Homotopy Extension and Classification	5
10.7	Eilenberg-MacLane Spaces	5
10.8	Moore-Postnikov Decomposition	5
10.9	Computation with Lie Groups and their Quotients	5
10.10	Homology with Local Coefficients	5
10.11	Exercises	5
11	Homology of Fibre Spaces	5
11.1	Generalities about Fibrations	5
11.2	Thom Isomorphism Theorem	5
11.3	Fibrations over Suspensions	5
11.4	Cohomology of Classical Groups	5
11.5	Exercises	5

12 Characteristic Classes	5
12.1 Orientation and Euler Class	5
12.2 Construction of Steifel-Whitney Classes and Chern Classes	5
12.3 Fundamental Properties	5
12.4 Splitting Principles and Uniqueness	5
12.5 Complex Bundles and Pontrjagin Classes	5
12.6 Exercises	5
13 Spectral Sequences	5
13.1 Warm-Up	5
13.2 Exact Couples	5
13.3 Algebra of Spectral Sequences	5
13.4 Leray-Serre Spectral Sequences	5
13.5 Immediate Applications	5
13.6 Transgression	5
13.7 Cohomology Spectral Sequences	5
13.8 Serre Classes	5
13.9 Homotopy Groups of Spheres	5

1 Introduction

- 1.1 The Basic Problem
- 1.2 Fundamental Group
- 1.3 Function Spaces and Quotient Spaces
- 1.4 Relative Homology
- 1.5 Some Typical Constructions
- 1.6 Cofibrations
- 1.7 Fibrations
- 1.8 Categories and Functors
- 1.9 Exercises

2 Cell Complexes and Simplicial Complexes

- 2.1 Basics of Convex Polytopes
- 2.2 Cell Complexes
- 2.3 Products of Cell Complexes
- 2.4 Homotopical Aspects
- 2.5 Cellular Maps
- 2.6 Abstract Simplicial Complexes
- 2.7 Geometric Realisation of Simplicial Complexes
- 2.8 Barycentric Subdivision
- 2.9 Simplicial Approximation
- 2.10 Links and Stars
- 2.11 Exercises

3 Covering Spaces and Fundamental Group

- 3.1 Basic Definitions
- 3.2 Lifting Properties
- 3.3 Relation with the Fundamental Group
- 3.4 Classification of Covering Projections
- 3.5 Group Action
- 3.6 Pushouts and Free Products
- 3.7 Siefert-van Kampen Theorem
- 3.8 Applications
- 3.9 Exercises

4 Homology Groups

- 4.1 Basic Homological Algebra
- 4.2 Singular Homology Groups
- 4.3 Construction of Some Other Homology Groups
